

North Carolina Investment Pool - Liquid Portfolio

Principal Stability Fund Ratings Definitions

AAAm A fund rated 'AAAm' demonstrates extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. 'AAAm' is the highest principal stability fund rating assigned by S&P Global Ratings

AAm A fund rated 'AAm' demonstrates very strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. It differs from the highest-rated funds only to a small degree.

Am A fund rated 'Am' demonstrates strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk, but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than funds in higher-rated categories

BBBm A fund rated 'BBBm' demonstrates adequate capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. However, adverse economic conditions or changing circumstances are more likely to lead to a reduced capacity to maintain principal stability.

BBm A fund rated 'BBm' demonstrates speculative characteristics and uncertain capacity to maintain principal stability. It is vulnerable to principal losses due to credit risk. While such funds will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

Dm A fund rated 'Dm' has failed to maintain principal stability resulting in a realized or unrealized loss of principal.

Plus (+) or Minus (-)
The ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Portfolio Composition as of September 26, 2024

CP - Commercial Paper; REPO - Repurchase Agreement; ABCP - Asset-backed commercial paper; GOV-AGCY - Agency and Government; TREAS - Treasury

Rationale

North Carolina Investment Pool (NCIP) - Liquid Portfolio is rated 'AAAm' by S&P Global Ratings. The rating is based on S&P Global Ratings' analysis of the portfolio's credit quality, investment policies, market price exposure, and management. The rating signifies our forward looking opinion about a fixed-income fund's ability to maintain principal value (i.e., stable net asset value, or 'NAV').

Overview

NCIP – Liquid Portfolio is a common law pool created in accordance with North Carolina General Statute 159-30(c)(10), and formed by an interlocal agreement entered into in accordance with North Carolina General Statutes 160A-461 through 464, for units of local government in North Carolina to pool their idle funds for investment purposes.

Management

The NCIP - Liquid Portfolio is managed by PFM Asset Management LLC (PFMAM), a subsidiary of U.S. Bancorp Asset Management, Inc. through acquisition as of December 7, 2021. PFMAM, based in Harrisburg, PA, currently manages 17 'AAAm' rated local government investment pools. As the fund's investment adviser and administrator, PFMAM is responsible for the purchase and sale of all portfolio assets. PFMAM is registered with the SEC under the Investment Advisers Act of 1940 and specializes in creating investment strategies and managing funds for public sector, not-for-profit and other institutional clients.

Portfolio Assets

The investment objective of the NCIP – Liquid Portfolio is to earn the highest income consistent with preserving principal and maintaining liquidity, and to maintain a stable NAV of \$1.00 per share. The NCIP - Liquid Portfolio seeks to achieve its

investment objective by investing in various money market security types, including U.S. Treasury securities, U.S. government agencies and government-sponsored enterprises, bankers' acceptances, commercial paper, repurchase agreements, municipal obligations, and collateralized or FDIC insured bank deposits and certificates of deposit. The NCIP – Liquid Portfolio seeks to be compliant with guidelines similar to those mandated for money-market funds governed by Rule 2a-7 of the Investment Company Act of 1940. NCIP is managed accordance with the requirements of Statement No. 79 of the Governmental Accounting Standards Board, NCIP maintains a weighted average maturity to reset (WAM(R)) of 60 days or less in order to maintain sufficient liquidity for redemptions and to limit market price exposure.

Principal Stability Rating Approach and Criteria

A S&P Global Ratings principal stability fund rating, also known as a "money market fund rating", is a forward-looking opinion about a fixed income fund's capacity to maintain stable principal (net asset value). When assigning a principal stability rating to a fund, S&P Global Ratings analysis focuses primarily on the creditworthiness of the fund's investments and counterparties, and also its investments' maturity structure and management's ability and policies to maintain the fund's stable net asset value. Principal stability fund ratings are assigned to funds that seek to maintain a stable or an accumulating net asset value.

Generally, when faced with an unanticipated level of redemption requests during periods of high market stress, the manager of any fund may suspend redemptions for up to five business days or meet redemption requests with payments in-kind in lieu of cash. A temporary suspension of redemptions or meeting redemption requests with distributions in-kind does not constitute a failure to maintain stable net asset values. However, higher rated funds are expected to have stronger capacities to pay investor redemptions in cash during times of high market stress because they generally comprise shorter maturity and higher quality investments.

Principal stability fund ratings, or money market fund ratings, are identified by the 'm' suffix (e.g., 'AAAm') to distinguish the principal stability rating from a S&P Global Ratings traditional issue or issuer credit rating. A traditional issue or issuer credit rating reflects S&P Global Ratings view of a borrower's ability to meet its financial obligations. Principal stability fund ratings are not commentaries on yield levels.
