

Oklahoma Public School Liquid Asset Pool

Principal Stability Fund Ratings Definitions

AAAm A fund rated 'AAAm' demonstrates extremely strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. 'AAAm' is the highest principal stability fund rating assigned by S&P Global Ratings

AAm A fund rated 'AAm' demonstrates very strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. It differs from the highest-rated funds only to a small degree.

Am A fund rated 'Am' demonstrates strong capacity to maintain principal stability and to limit exposure to principal losses due to credit risk, but is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than funds in higher-rated categories

BBBm A fund rated 'BBBm' demonstrates adequate capacity to maintain principal stability and to limit exposure to principal losses due to credit risk. However, adverse economic conditions or changing circumstances are more likely to lead to a reduced capacity to maintain principal stability.

BBm A fund rated 'BBm' demonstrates speculative characteristics and uncertain capacity to maintain principal stability. It is vulnerable to principal losses due to credit risk. While such funds will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

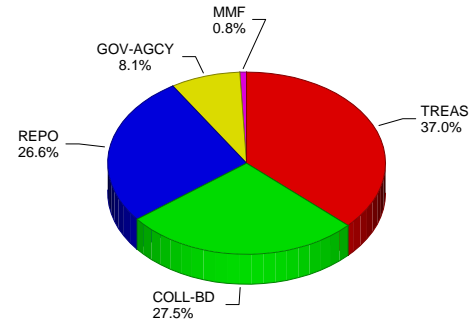

Dm A fund rated 'Dm' has failed to maintain principal stability resulting in a realized or unrealized loss of principal.

Plus (+) or Minus (-)
The ratings may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories.

Portfolio Composition as of September 26, 2024

TREAS - Treasury; COLL-BD - Collateralized Bank Deposits; REPO - Repurchase Agreement; GOV-AGCY - Agency and Government; MMF - Money Market Fund

Rationale

The Oklahoma Public School Liquid Asset Pool is rated 'AAAm' by S&P Global. This rating is based on S&P Global's analysis of the pool's credit quality, market price exposure, and management. The rating signifies our forward-looking opinion about a fixed income fund's ability to maintain principal value (i.e., stable net asset value (NAV) of \$1.00 per share). This is accomplished through conservative investment practices and strict internal controls. The pool is monitored on a weekly basis by S&P Global.

Overview

OLAP is a program created by the Oklahoma Public School Investment Interlocal, a cooperative organized and existing under the laws of the state of Oklahoma. The Interlocal was established for Oklahoma school districts to pool their investment funds to obtain competitive interest rates while maintaining liquidity, preserving capital, and complying with Oklahoma law governing investing school funds.

In accordance with stated metrics for 'AAAm' PSFRs, we expect the fund will maintain a diversified portfolio of high-quality fixed-income investments with a portfolio maximum weighted average maturity of 60 days and a maximum weighted average life of 90-120 days.

Management

The pool's investment adviser is PMA Asset Management, LLC a registered investment adviser focused on serving the investment needs of public entities, insurance companies, and institutional investors in the United States. As of September 2024, PMA companies had over \$31.9 billion in assets under management. In addition to OLAP, PMA Asset Management also serves as investment adviser for 12 other 'AAAm' rated local government investment pools. PMA Financial Network, LLC

serves as operational manager and its affiliate, PMA Securities, LLC serves as the distributor and U.S. Bank N.A. is the custodian.

Portfolio Assets

OLAP can invest in the obligations of the U.S. government and its agencies; state and local obligations; repurchase agreements; money market mutual funds; and the obligations of financial institutions, such as certificates of deposit and bankers' acceptances. Additionally, our 'AAAm' PSFR subjects such securities to certain minimum credit quality thresholds.

All Oklahoma school districts are eligible to become members of the Interlocal and participate in its programs, including OLAP,

Principal Stability Rating Approach and Criteria

A S&P Global Ratings principal stability fund rating, also known as a "money market fund rating", is a forward-looking opinion about a fixed income fund's capacity to maintain stable principal (net asset value). When assigning a principal stability rating to a fund, S&P Global Ratings analysis focuses primarily on the creditworthiness of the fund's investments and counterparties, and also its investments' maturity structure and management's ability and policies to maintain the fund's stable net asset value. Principal stability fund ratings are assigned to funds that seek to maintain a stable or an accumulating net asset value.

Generally, when faced with an unanticipated level of redemption requests during periods of high market stress, the manager of any fund may suspend redemptions for up to five business days or meet redemption requests with payments in-kind in lieu of cash. A temporary suspension of redemptions or meeting redemption requests with distributions in-kind does not constitute a failure to maintain stable net asset values. However, higher rated funds are expected to have stronger capacities to pay investor redemptions in cash during times of high market stress because they generally comprise shorter maturity and higher quality investments.

Principal stability fund ratings, or money market fund ratings, are identified by the 'm' suffix (e.g., 'AAAm') to distinguish the principal stability rating from a S&P Global Ratings traditional issue or issuer credit rating. A traditional issue or issuer credit rating reflects S&P Global Ratings view of a borrower's ability to meet its financial obligations. Principal stability fund ratings are not commentaries on yield levels.
