S&P Global
Ratings

- Over the past 18 months, we have seen a growing number of alternative investment funds (AIFs) tapping the debt markets with bonds, private loans, net asset value (NAV) facilities, and capital call facilities, also known as subscription lines. This private market activity reflects a slowdown in traditional fundraising and weaker deal activity, among other dynamics.
- In this primer, we explain how we apply our AIF methodology to various fund structures—notably private equity, public equity, venture capital, and private debt funds— alongside hedge funds and some investment companies that share key characteristics of AIFs.
- Our analysis reflects a fund's ability to repay its recourse liabilities on time in a theoretical liquidation scenario following a 'BBB' or moderate stress. We detail how we calculate stressed leverage for different types of funds, how we capture the risks relating to the funding and liquidity of different fund structures, and how we rate instruments issued by AIFs.
- Some examples reflect public ratings, and some are hypothetical examples that draw on private or confidential ratings.

S&P Global
Ratings

Our analysis reflects a fund's ability to repay its recourse liabilities on time in a theoretical liquidation scenario following a 'BBB' or moderate stress.

Underlying sources of data that we use to determine ratings in the AIF space:

- Historical S&P Global Ratings default rates and historical peak-to-trough drawdowns for credit funds.
- Historical drawdowns in prices for equity/private equity and real estate funds.

*We plan to publish a request for comment on our proposed new methodology for analyzing subscription lines or facilities secured by an AIF's limited partner capital commitments (see "[Advance Notice Of Proposed Criteria Change: Subscription Lines Secured By Capital Commitments](#)," published on Sept. 15, 2023). FSFC--Financial services finance company. Source: S&P Global Ratings.

Types Of Funds We Could Rate Under Our AIF Methodology

S&P Global Ratings has provided transparency on AIFs and this expanding market since 2006—and our coverage and criteria have evolved. We apply our global framework for rating AIFs (updated most recently in 2021) to various funds and other investment companies that share key characteristics of AIFs:

Private equity fund

3i Group PLC

An Investment Company Rated Under Our AIF Criteria

Investment strategy

- 3i Group is a FTSE100-listed investment company specializing in private equity and infrastructure and investing in mid-market companies in Europe and North America.
- It realizes assets through business cycles and does not rely on fee income or EBITDA generation to repay its debt obligations (therefore it is closer to a buy-and-hold fund).
- It is also an investment manager of several infrastructure funds, many of which it holds a stake in (for example, 3i Infrastructure or 3iN).

Funding policy

- A mixture of shareholder funds and borrowings from banks and capital markets. Limited structural gearing.

MCP DASLF

A private debt fund

Investment strategy

- The fund is an open-ended unit trust domiciled in Australia.
- The fund invests in a diversified portfolio of corporate loans, including syndicated loans to public and private companies (45% relates to real estate).
- The fund follows a "buy and hold" philosophy, keeping its loan assets to maturity in nearly all instances.

Funding policy

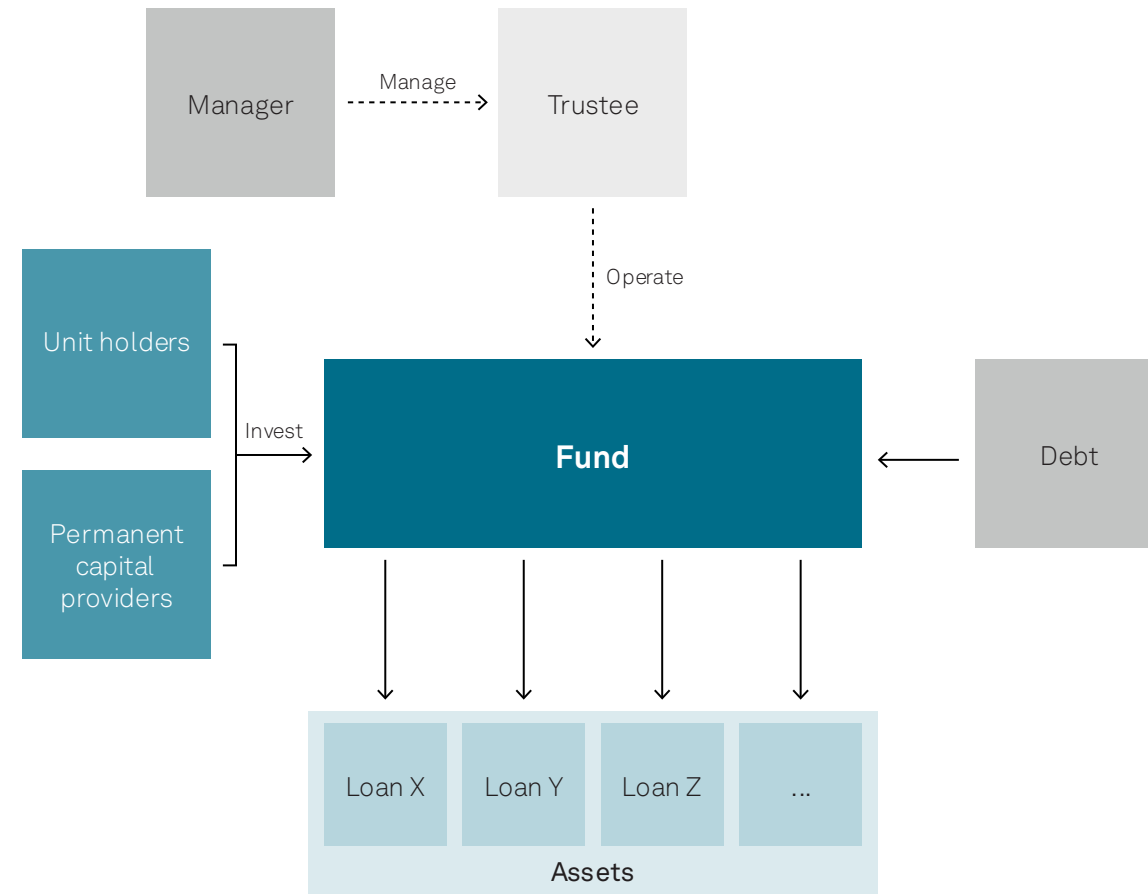

- Permanent capital was about 23% as of Dec. 31, 2022, and comes from listed retail-based Metrics Master Income Trust (the permanent capital provider).
- Other sources of capital are retail investors, overseas feeder funds, and direct wholesale investors (unit holders).
- As of March 31, 2023, the fund had access to a A\$1.25 billion syndicated revolving credit facility and a A\$300 million term loan facility.

MCP Real Estate Debt Fund

Investment strategy

- The fund is an open-ended unit trust domiciled in Australia.
- The fund provides debt financing to the Australian real estate sector through a mix of direct and indirect lending.
- The fund follows a "buy and hold" philosophy, keeping its loan assets to maturity in nearly all instances.

Funding policy

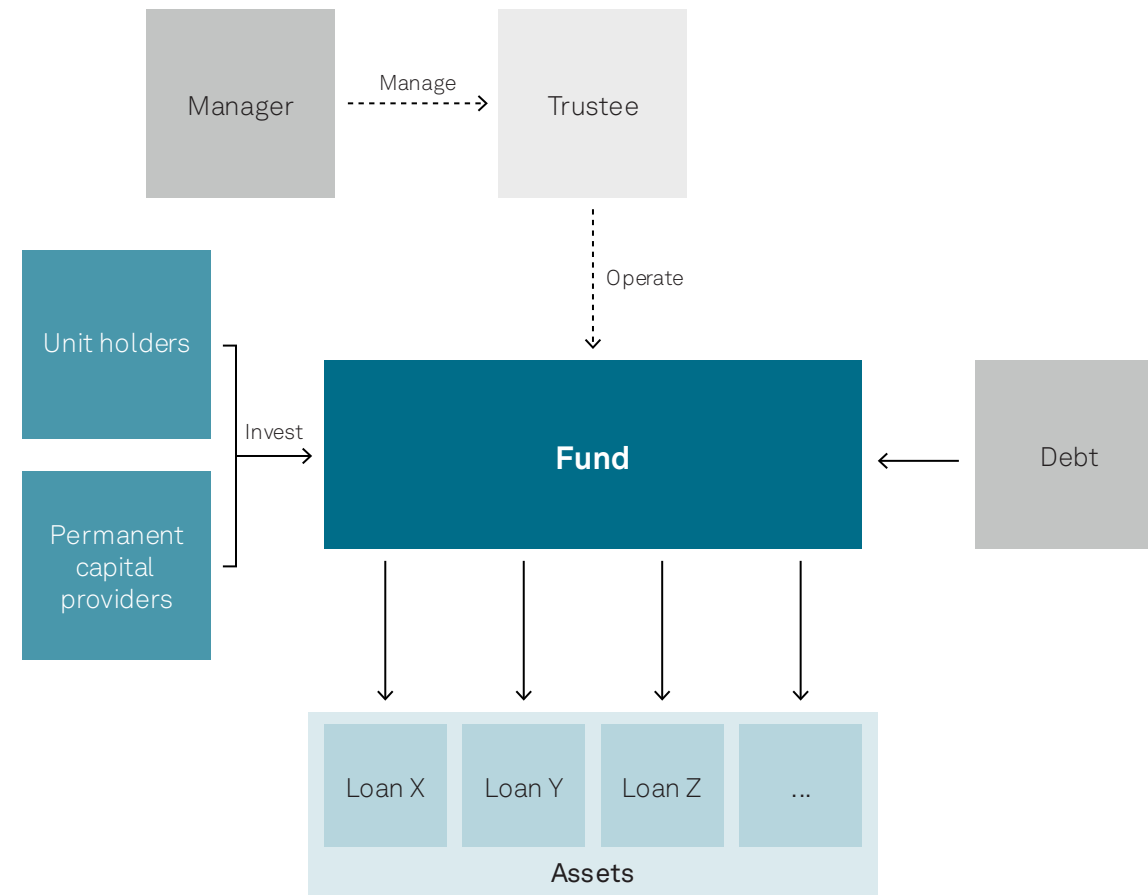

- Permanent capital represented about 30% of total equity funding as of Dec. 31, 2022. The fund receives permanent capital from the group's two Australian Securities Exchange-listed vehicles: Metrics Master Income Trust and Metrics Income Opportunities Trust (the permanent capital providers).
- Other sources of capital are retail investors, overseas feeder funds, and direct wholesale investors (the unit holders).
- The fund has access to an A\$300 million syndicated bank debt facility.

Citadel K/KII/W

An open-ended hedge fund

Investment focus

- The three funds actively trade equities, fixed income and macro credit (including convertibles), commodities, and quantitative strategies. The allocation of capital to the various asset classes and strategies varies depending on trading opportunities.

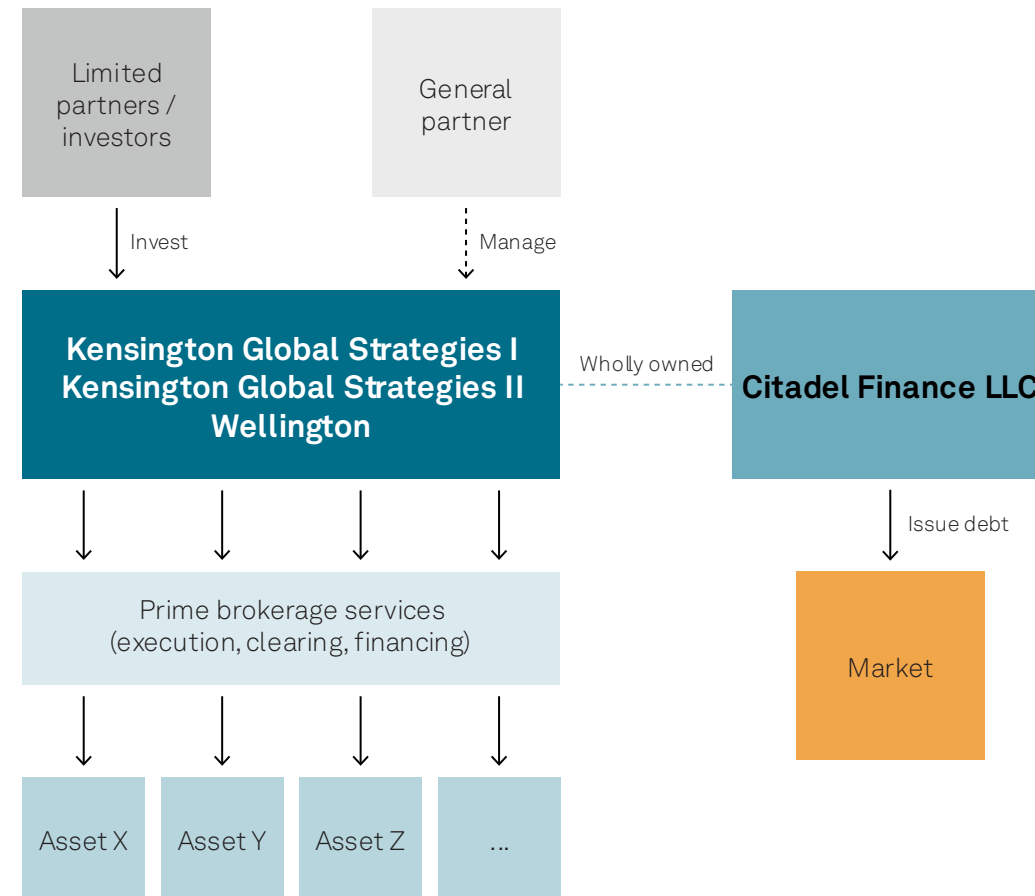

Limited partners' commitments

- The funds are open-ended, with the potential for the general partners to limit or halt redemptions. About 70% of the capital base is redeemable quarterly over 16 quarters (one-sixteenth every quarter). The remaining 30% of the capital is subject to a rolling two-year committed lock without penalty.

S&P Global
Ratings

Stressed leverage measures a fund's ability to cover outstanding financial obligations in adverse economic conditions or changing circumstances.

- **For funds that use more transparent, traditional strategies** and have asset profiles that do not change significantly over a short time horizon, we typically apply a **haircut to the assets** to reflect typical market movements in a 'BBB', or moderate, stress scenario and compare the ability of the stressed assets to cover total recourse liabilities (stressed assets to total recourse liabilities).
- **We devised a set of haircuts for the most common asset classes. For example:**
 - 36% for U.S. 'BB' coupon-bearing corporate bonds with a residual maturity of five-to-seven years;
 - 85% for 'AAA' rated commercial mortgage-backed securities;
 - 50% for listed stocks;
 - 60% for private equity; and
 - 0% for cash and cash equivalents.

Stressed assets to total recourse liabilities

Assessment	Range
Very strong	>3.5x
Strong	2.5x-3.5x
Adequate	1.75x-2.5x
Moderate	1.0x-1.75x
Weak	0.5x-1.0x
Very weak	<0.5x

- For asset classes for which we do not already have a haircut, we typically take one of two approaches:
 - We find the closest asset class that we have a stated haircut for and adjust using the risk position; or
 - We apply a haircut to the asset of 25%, 50%, 75%, or 100%, based on our view of the asset as low risk, medium risk, high risk, or very high risk.
- **Total recourse liabilities include all debt obligations issued by a fund, repurchase agreements, and prime brokerage financing.** They exclude nonrecourse liabilities (such as collateralized loan obligation debt) and the portion of hybrids to which we assign equity content.

Stressed Leverage For Funds With More Complex Strategies

S&P Global
Ratings

Stressed leverage measures a fund's ability to cover outstanding financial obligations in adverse economic conditions or changing circumstances.

- **For funds that use more complex strategies or have a large turnover position,** we typically consider portfolio-based risk measures to assess the sufficiency of a fund's equity under stress (**VaR/NAV**).
- We typically assess stressed leverage based on a measure of VaR using a one-year horizon and a 99.7% confidence level. We typically adjust with an additional stress to compensate for the fact that regulators typically do not validate VaR calculations for AIFs.
- We typically compute a one-year VaR at a 99.7% confidence level by scaling up (or down) the risk metrics a fund reports. Importantly, the starting point of our analysis is a risk metric that a fund uses in daily risk management and that is regularly back tested. Weak back-testing results result in a higher multiplier.

Portfolio-based risk measures

Assessment	VaR/NAV range (%)
Very strong	<20
Strong	20-40
Adequate	40-55
Moderate	55-75
Weak	75-100
Very weak	>100

VaR--Value at risk. NAV--Net asset value.

Ratings

Adjustment for risk position

We refine our view of leverage and asset risk beyond the standard assumptions by looking at six factors:

- Risks not captured in stressed leverage (for example, interest-rate risk, spread risk, or currency risk);
- Concentration (for example, single-name, geographical, or sector concentration);
- Risk of the strategy;
- Volatility of past investment returns;
- Appropriateness of stresses (that is, the risks captured in stressed leverage, but for which the haircut might not be totally appropriate given the specific nature of the risks); and
- Quality of capital.

S&P Global
Ratings

Funding

We consider the **relative stability of an AIF's sources of funding** and the extent to which stable funding is important given the investment strategy:

- Stability and diversity of the investor capital base;
- Stability and diversity of the funding sources (nonequity funding);
- Prime brokerage relationships; and
- Funding flexibility.

Liquidity

The quantitative test

- For funds that use a more transparent, traditional strategy—we assess **sources divided by uses under a stress scenario** over a one-year horizon. We typically apply a haircut to assets to reflect their potential loss in liquidation value in a 'BBB' stress scenario.
- For funds that use more complex strategies or have a large turnover position, we typically evaluate liquidity through the key quantitative indicator of **liquidity reserves to trading capital**.

Qualitative factors

- **Asset liquidity:** Level I assets are a positive. Level III assets are a negative.
- **Cash flow from the portfolio:** Predictable cash flow coming from the portfolio is a positive. No recurring cash flow from the portfolio is a negative.
- **Covenant analysis:** No covenants affecting liquidity (debt, derivative, or performance covenants) is a positive. If there are covenants, the assessment is more negative as the covenants are more likely to be breached, triggering liquidity outflows that the quantitative liquidity test does not already reflect.

Track record and investment performance

Addresses potential investment return volatility and profitability (both absolute and relative).

Risk management

Addresses certain risks that are not otherwise captured. These relate to a fund's trading and credit risk management, operational risk management, and management and governance risk.

We may consider risk management practices to be a substantial risk to a fund. Examples include but are not limited to:

- When formal systems to encourage the representation of creditor rights are insufficient;
- When the fund is unable to generate periodic risk reports consistent with past behavior; and
- When we believe that substantial operational deficiencies exist, given the complexities of the investment profile.

Transparency and complexity

Addresses risks relating to a fund's complexity or the transparency of its disclosures.

Comparable ratings adjustment

We may apply an adjustment based on our comparable ratings analysis to capture a more holistic view of creditworthiness. This allows for the consideration of additional credit factors that the criteria do not identify separately, as well as existing credit factors that are not fully captured, but that may be informed by our peer analysis.

Ratings

Senior secured

- We often rate all secured debt and senior unsecured debt at the same level as the ICR.
- However, we may rate first-lien senior secured debt higher than the ICR by one notch if we believe that the collateral backing the debt is sufficient to repay secured creditors after applying our stressed leverage haircuts with 20% over-collateralization.

Junior secured and senior unsecured debt

- Often at the same level as the ICR.
- One notch below the ICR when either of the following conditions apply:
 - Priority debt is greater than 15% of adjusted assets, and we expect unencumbered assets to be less than the rated unsecured or junior secured debt; or
 - Priority debt is greater than 30% of adjusted assets, and we expect unencumbered assets to be greater than the rated unsecured or junior secured debt.
- Two notches below the ICR when both of the following conditions apply:
 - Priority debt is greater than 30% of adjusted assets; and
 - We expect unencumbered assets to be less than the rated unsecured or junior secured debt.

When considering the conditions above, we deduct nonrecourse secured debt from priority debt, and we deduct the assets pledged to that debt from adjusted assets.

No content (including ratings, credit-related analyses and data, valuations, model, software or other application or output therefrom) or any part thereof (Content) may be modified, reverse engineered, reproduced or distributed in any form by any means, or stored in a database or retrieval system, without the prior written permission of Standard & Poor's Financial Services LLC or its affiliates (collectively, S&P). The Content shall not be used for any unlawful or unauthorized purposes. S&P and any third-party providers, as well as their directors, officers, shareholders, employees or agents (collectively S&P Parties) do not guarantee the accuracy, completeness, timeliness or availability of the Content. S&P Parties are not responsible for any errors or omissions (negligent or otherwise), regardless of the cause, for the results obtained from the use of the Content, or for the security or maintenance of any data input by the user. The Content is provided on an "as is" basis. S&P PARTIES DISCLAIM ANY AND ALL EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE, FREEDOM FROM BUGS, SOFTWARE ERRORS OR DEFECTS, THAT THE CONTENT'S FUNCTIONING WILL BE UNINTERRUPTED, OR THAT THE CONTENT WILL OPERATE WITH ANY SOFTWARE OR HARDWARE CONFIGURATION. In no event shall S&P Parties be liable to any party for any direct, indirect, incidental, exemplary, compensatory, punitive, special or consequential damages, costs, expenses, legal fees, or losses (including, without limitation, lost income or lost profits and opportunity costs or losses caused by negligence) in connection with any use of the Content even if advised of the possibility of such damages.

Credit-related and other analyses, including ratings, and statements in the Content are statements of opinion as of the date they are expressed and not statements of fact. S&P's opinions, analyses, and rating acknowledgment decisions (described below) are not recommendations to purchase, hold, or sell any securities or to make any investment decisions, and do not address the suitability of any security. S&P assumes no obligation to update the Content following publication in any form or format. The Content should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. S&P does not act as a fiduciary or an investment advisor except where registered as such. While S&P has obtained information from sources it believes to be reliable, S&P does not perform an audit and undertakes no duty of due diligence or independent verification of any information it receives. Rating-related publications may be published for a variety of reasons that are not necessarily dependent on action by rating committees, including, but not limited to, the publication of a periodic update on a credit rating and related analyses.

To the extent that regulatory authorities allow a rating agency to acknowledge in one jurisdiction a rating issued in another jurisdiction for certain regulatory purposes, S&P reserves the right to assign, withdraw, or suspend such acknowledgement at any time and in its sole discretion. S&P Parties disclaim any duty whatsoever arising out of the assignment, withdrawal, or suspension of an acknowledgment as well as any liability for any damage alleged to have been suffered on account thereof.

S&P keeps certain activities of its business units separate from each other in order to preserve the independence and objectivity of their respective activities. As a result, certain business units of S&P may have information that is not available to other S&P business units. S&P has established policies and procedures to maintain the confidentiality of certain nonpublic information received in connection with each analytical process.

S&P may receive compensation for its ratings and certain analyses, normally from issuers or underwriters of securities or from obligors. S&P reserves the right to disseminate its opinions and analyses. S&P's public ratings and analyses are made available on its Web sites, www.spglobal.com/ratings (free of charge) and www.ratingsdirect.com (subscription) and may be distributed through other means, including via S&P publications and third-party redistributors. Additional information about our ratings fees is available at www.spglobal.com/ratings/usratingsfees.

Australia: S&P Global Ratings Australia Pty Ltd holds Australian financial services license number 337565 under the Corporations Act 2001. S&P Global Ratings' credit ratings and related research are not intended for and must not be distributed to any person in Australia other than a wholesale client (as defined in Chapter 7 of the Corporations Act).
