Key Facts – SAM Indexes

- Cooperation with Dow Jones Indexes for the publication and licensing of the **Dow Jones Sustainability Indexes** (DJSI). Launch in 1999.
- Broad family of DJSI benchmarks including Global, European, Eurozone,
 North American, US, Asia Pacific, and Japanese indexes.
- Over 8 billion USD in DJSI-based investment vehicles.
- Compiling the Australian SAM Sustainability Index (AuSSI) and further customized theme indexes (e.g. World Water Index, World Solar Energy Index)
- Launched the DJSI Korea in partnership with the Korea Productivity Centre in October 2009.

Dow Jones Sustainability Indexes (DJSI)

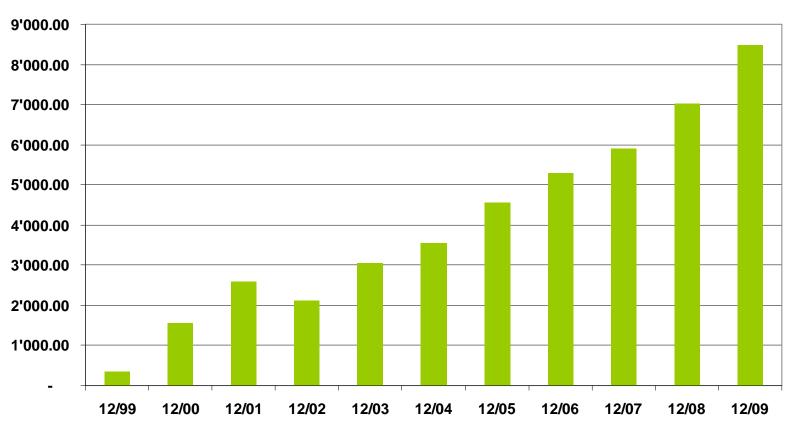

Overview

- Integrated assessment of **economic**, **environmental** and **social criteria** with a strong focus on **long-term shareholder value**.
- Consistent rules-based methodology, primary research (direct contact to companies).
- Focus on best-in-class companies. Yearly review and continuous monitoring of companies.
- Assurance of the assessment process by **Deloitte**.

DJSI Assets

Assets based on DJSI (in million USD)

Assessment Universe 2010

Number of invited companies

- Total Number Invited Companies = 2,617
 - DJSI World Universe = 2,500
 - DJSI Europe Universe = 600
 - DJSI North America Universe = 600
 - DJSI Asia Pacific = 600
 - DJSI Korea = 200

Number of assessed companies

- Companies analysed globally = 1,393
- Companies completing questionnaire = 698
- Companies analyzed based exclusively on public information = 695

Assessment Criteria Changes

Criteria	Key changes compared to 2009
Brand Management	We have moved away from the focus on brand calculation and shifted the emphasis on how the branding strategies are coordinated and how the companies ensure some alignment between their branding strategies and their overall sustainability strategies (in order to make them mutually reinforcing rather than sending mixed messages to consumers).
Occupational Health & Safety	This criteria has been reworked to add a focus on early identification of OHS-related risks and on incentives to promote health, safety and well-being amongst employees.
Water Related Risks	This new criteria has been introduced for the first time in the 2010 assessment. Based on our analysis of water consumption, 13 sectors have been identified as potentially exposed to water-related risks. The questions introduced in these 13 sectors focus on water availability and quality as a new source of risks for companies. They seeks to assess whether companies are able to measure their exposure to water-related risks and whether they have appropriate risk management systems in place to mitigate risks around quantity/quality of water, regulatory changes or stakeholder conflicts.

Assessment Criteria Changes II

Criteria	Key changes compared to 2009
Corporate Citizenship	This criteria has been reworked to be more aligned with the London Benchmarking Group (LBG) model. LBG specializes in helping companies to manage (and report on) their philanthropic activities. Following the LBG model, the new set of questions looks at (1) what motivates companies to engage in philanthropic activities (business case), (2) whether they are mostly engaging in pure charitable activities or doing of mix of pure philanthropy and win-win community investments programs that benefit both the company and the communities, (3) whether they have an overview of related costs (cash donations, time of employee volunteering, in-kind donations but also management costs for running these programs) and (4) whether they use some KPIs at group level to measure the benefits to the communities and the company.
Risk and Crisis Management	For some sectors some existing questions have been adapted to add an explicit focus on environmental risks (either water, climate change or both). They seek to assess if the Chief Risk Officer also have responsibility for water / climate risks and if the sensitivity analysis and stress testing also include water / climate risks. For financial sectors, old questions have been replaced with a whole new set of questions focusing on enterprise risk management system. The questions assesses the responsibilities for different aspects of the ERM

Adjustments to Sustainability Assessment 2010

- On October 8th 2010 SAM identified an issue in the software used to evaluate the results of the Corporate Sustainability Assessments.
- On November 4th 2010 SAM announced that the review of the Corporate Sustainability Assessment is complete
- Out of the initial 318 components in the 2010 Dow Jones Sustainability World Index (DJSI World), 8 companies joined the index, while 3 firms were deleted
- The review also led to 8 additions and 2 removals from the DJSI Europe, 2 additions and 1 removal from the DJSI North America, as well as 2 additions to the DJSI Asia Pacific. The DJSI Korea was left unchanged
- All changes will take effect at the close of trading on December 17th, 2010
