

Rates & Reliability

2017 Utility Regulation Conference

December 5-6, 2017 | Liaison Capitol Hill, Washington, DC

Produced by the Knowledge Center, an executive conference from S&P Global Market Intelligence.

Under the new Administration, leadership at the federal level, including FERC, DOE, and EPA, has changed, and with it, a new utility landscape is being shaped. While utilities navigate new state and federal regulatory pressure, the same financial pressures continue.

Join us for this executive event and examine the top questions facing the industry, including:

- Pending FERC quorum, and how the commission will prioritize new and existing projects
- Shifting generation assets; will subsidies continue to steer portfolios?
- Designing a more dynamic rate case: fixed versus dynamic charges?

Featured Speakers

Senator Sheldon Whitehouse
Rhode Island

George Lowe
Vice President-AGA

Honorable Phillip Moeller
Executive Vice President-EEI

Christopher Mele
Legislative Director-NARUC
