

## iBoxx® Global Green, Social & Sustainability Bonds Index

iBoxx® Global Green, Social & Sustainability Bonds Index is designed to reflect the performance of global Green, Social and Sustainability investment grade and high yield sovereign, sub-sovereign and corporate debt denominated in EUR, USD, GBP and CAD, whilst upholding minimum standards of investability and liquidity. The index is part of a range of available iBoxx sustainable indices.

The index leverages external, independent sustainable data sources from Climate Bonds Initiative (“CBI”) and Environmental Finance to determine ‘Green’, ‘Social’, and ‘Sustainability’ bond classifications. The index considers bonds broadly based on the ICMA Green Bond Principles (GBP), Social Bond Principles (SBP), and Sustainability Bond Guidelines (SBG), although other securities whose ‘Use of Proceeds’ are directly pledged to sustainable investments are also eligible.

The minimum amount outstanding and time to maturity rules have been relaxed as compared to other iBoxx broad indices in respective currencies to better capture the underlying market. Rated bonds across investment grade and high yield) are eligible.

The index is rebalanced monthly on the last business day of the month. Only rated bonds from government, sub-sovereign, and corporate issuers with Green, Social and Sustainable criteria, are included in the index. The index is weighted by market value.

Transparent, independent, objective, and multi-dimensional coverage across all asset classes.

### Transparency

Documentation on our rules-based methodology for constituent selection, monthly rebalancing and daily total return calculations is publicly available.

### Independence

iBoxx® products utilize independent multi-source pricing and reference data subject to rigorous quality testing, with a fully documented price challenge process in place. We are committed to administering all financial benchmarks in compliance with IOSCO benchmark principles and is an authorised benchmark administrator under the European Benchmark Regulation (BMR).

### Multi-dimensional analysis

A wide range of analytical values are published to support risk, performance measurement and attribution analysis.

### Flexibility

iBoxx® offers the ability to customise indices to meet specific criteria.

### Depth of Data

A broad history of index and sub-index returns and analytics are available and published frequently to support index analysis.

### Key stats
