1 ESG Factor Disclosure for iBoxx SGD Green Bonds

Benchmark type	Fixed Income and Sovereign Debt
Report as of date	31 July 2024
ESG data sources	<p>The primary source for ESG data is Sustainalytics ESG Research. Further other sources, listed below, are referred for specific disclosures</p> <ul style="list-style-type: none"> • Climate Bond Initiative, Environmental Finance and IHS Markit Reference Data: Referred for green bonds. • World Bank data: Referred for (1) GHG intensity for Sovereigns and (2) Average income inequality score.
Coverage (% ,bond count)	For all reported ESG metrics coverage is calculated as number of bonds where the ESG metric is available relative to the total number of bonds in the index.
Coverage (% ,index weight)	For all reported ESG metrics coverage is calculated as to index weights where the ESG metric is available.
Applicable Disclosures	Disclosures applicable for Sovereigns / Fixed Income Corporates are highlighted as (Sov/Corp*) respectively, as per Commission Delegated Regulation supplementing Regulation (EU) 2016/1011

iBoxx Sector classification	Index Weight
Corporates, Collateralized, Sub-Sovereigns	53.0%
Sovereigns	47.0%
Total	100.0%

2 Combined ESG Factors Disclosure

Disclosure Factors			Factor Value	Coverage (%, bond count)	Coverage (%, index weight)
Consolidated ESG Rating	Consolidated ESG Score	Corporates	19.7	26.3%	6.0%
		Sovereigns	68.7	47.4%	85.5%
	Rating Distribution		ESG Risk Category		Index Weight
			Negligible		0.0%
			Low		89.3%
			Medium		0.0%
			High		2.1%
			Severe		0.0%
		Not Rated		8.5%	
ESG Ratings of Top 10 Constituents	Issuer	Coupon (%)	Maturity	Index Weight	ESG Risk Rating
	Singapore Government Bond	3.000	01-08-72	31.38%	Low
	Singapore Government Bond	3.250	01-06-54	15.61%	Low

Freedom of Expression Score (Sov*)		51.9	47.4%	85.5%
ILO Policy Non-Compliance (% , Index Weight) (Corp*)		0.0%	26.3%	6.0%
Gender Pay Gap Score (Weighted average ratio) (Corp*)		-	0.0%	0.0%
Female to Male Board Members (% , Weighted average ratio) (Corp*)		24.5	26.3%	6.0%
Accidents, Injuries, Fatalities (Weighted average count) (Corp*)		1.6	21.1%	5.1%
Corruption & Bribery Convictions (Number of cases) (Corp*)		0.0	26.3%	6.0%

5 Governance ESG Factors Disclosure

Disclosure Factors		Factor Value	Coverage (%, bond count)	Coverage (%, index weight)
Consolidated Governance Score	Corporates	5.1	26.3%	6.0%
	Sovereigns	73.7	47.4%	85.5%
Corruption Score (Sov*)		86.2	47.4%	85.5%
Political Stability Score (Sov*)		79.7	47.4%	85.5%
Rule of Law Score (Sov*)		82.1	47.4%	85.5%

6 ESG Factors Description

Disclosure Factors	Description
Consolidated ESG Rating (Corporates)	Weighted average of Overall Risk Score. It refers to a company's overall score in the ESG Risk Ratings that measures the extent to which enterprise value is at risk driven by ESG factors. Range: 0 to 100; lower score represents higher rating.
Consolidated ESG Rating (Sovereigns)	Weighted average of Overall ESG Factors Score. Range: 0 to 100; higher score represents higher rating.
Rating Distribution(ESG Risk Category)	Corporates and Sovereigns ESG scores are calculated and aggregated on opposite scales and cannot be directly combined at index level; ESG scores are translated into different ESG risk categories, which range from Negligible to Severe.
International Standards Signatories %	Considers country's ratification of controversial weapons treaties or conventions as listed below. Countries are considered if all conventions and treaties have been ratified. <ul style="list-style-type: none"> Controversial Weapons Conventions-Score: Includes the Arms Trade Treaty and all international conventions on weapons considered to be controversial. Environmental Conventions-Score: Includes major environmental treaties such as the Paris Agreement and the Kyoto Protocol Human Rights Conventions-Score: Based on the fundamental human rights conventions Labour Rights Conventions-Score: Based on the eight core International Labour Organization (ILO) labour rights conventions. Range: 0 to 100; higher score represents high number of signatories to International Standards.
Consolidated Environmental Score (Corporates)	Weighted average of Environmental Risk Score. Range: 0 to 100; lower score represents higher rating.
Consolidated Environmental Score(Sovereigns)	Weighted average of Environmental ESG Factors Score. Range: 0 to 100; higher score represents higher rating.
GHG Intensity (Corporates)	Carbon intensity is computed as the ratio of Absolute emissions to revenues. Absolute emissions, either reported or estimated, consider multiple greenhouse gases expressed in terms of tons of CO ₂ ; revenues are computed in millions of US\$. Range: 0 to 9999; lower score represents lower green house gas intensity.
GHG Intensity (Sovereigns)	Carbon emissions intensity of countries expressed as the level of emissions (Kton) per unit of GDP (millions of €) Range: Not Defined;
Percentage of Reported / Estimated emissions	Reported / Estimated emissions % is not applicable for Sovereigns. Indicates whether emissions are reported ("Reported") or estimated ("Estimated").
High Climate Impact (NACE) Sectors	Covering specific sectors as listed in Sections A to H and Section L of Annex I to Regulation (EC) No 1893/2006 Section A — Agriculture, Forestry and Fishing Section B — Mining and Quarrying Section C — Manufacturing

Disclosure Factors	Description
	<p>Section D — Electricity, Gas, Steam and Air Conditioning Supply</p> <p>Section E — Water Supply; Sewerage, Waste Management and Remediation Activities</p> <p>Section F — Construction</p> <p>Section G — Wholesale and Retail Trade; Repair of Motor Vehicles And Motorcycles</p> <p>Section H — Transportation and Storage</p> <p>Section L — Real Estate Activities</p> <p>Range: 0 to 100; lower score represents lower exposure to climate impact (NACE) sectors.</p>
Energy and Mining (NACE) Sectors	<p>Covering specific activities falling under Divisions 05 to 09, 19 and 20 of Annex I to Regulation (EC) No 1893/2006</p> <p>Division 5 - Mining of coal and lignite</p> <p>Division 6 - Extraction of crude petroleum and natural gas</p> <p>Division 7 - Mining of metal ores</p> <p>Division 8 - Other mining and quarrying</p> <p>Division 9 - Mining support service activities</p> <p>Division 19 - Manufacture of coke and refined petroleum products</p> <p>Division 20 - Manufacture of chemicals and chemical products</p> <p>Range: 0 to 100; lower score represents lower exposure to energy and mining (NACE) sectors.</p>
Green Bonds	<p>The classification of instruments as Green Bonds is based upon usage of proceed as reported by Climate Bonds Initiatives (CBI) and Environmental Finance (EF). Data is further verified based on publicly available prospectus and other relevant documents.</p> <p>Range: 0 to 100; higher value represents higher weight of green bonds in the index.</p>
Consolidated Social Score (Corporates)	<p>Weighted average of Social Risk Score.</p> <p>Range: 0 to 100; lower score represents higher rating.</p>
Consolidated Social Score (Sovereigns)	<p>Weighted average of Social ESG Factors Score.</p> <p>Range: 0 to 100; higher score represents higher rating.</p>
Controversial Weapons Sector	<p>Exposure to companies with involvement in the controversial weapons sector. Field indicating whether any evidence of activity has been found with respect to controversial weapons. The Controversial Weapons Research covers the following types of weapons: Anti-Personnel Mines (AP), Biological and Chemical Weapons (BC), Cluster Weapons (CM), Nuclear Weapons (NW), Depleted Uranium (DU) and White Phosphorus (WP).</p> <p>Range: 0 to 100; lower value represents lower exposure to Controversial Weapons and related sectors.</p>
Tobacco Sector	<p>Exposure to companies with involvement in the tobacco sector. This indicator provides an assessment of whether companies derive revenues from tobacco products including cigarettes, cigars, tobacco, electronic cigarettes, paper used by end consumers for rolling cigarettes, filters, snuff tobacco, etc. This indicator looks at companies that manufacture tobacco products. This indicator also covers retailers and distributors of these products.</p> <p>Range: 0 to 100; lower value represents lower exposure to Tobacco and related sectors.</p>
Social Violations (Corporates)	<p>Covers companies' level of involvement in controversial events that have an impact on the environment or society. Involvement in events may indicate that a company's management systems are not adequate to manage relevant ESG risks. Each event is</p>

Disclosure Factors	Description
	<p>categorized from Category 1 (low impact on environment and society, posing negligible risks to the company) to Category 5 (severe impact on the environment and society, posing serious risks to the company). Every material ESG issue has one or more events linked to it.</p> <p>Range: 0 to 100; lower score represents low level of involvement in social violations.</p>
Social Violations (Sovereigns)	<p>Indicator captures events with high and severe negative ESG impact are that may affect the prosperity and economic development of a country and its ability to manage its wealth in an effective and sustainable manner.</p> <p>Lower value represents low level of involvement in social violations</p>
Human Rights Performance Score	<p>Aggregated quantitative indicator considering below listed indicators</p> <ul style="list-style-type: none"> ● Civil Liberties-Score: This indicator captures perceptions of the extent to which a country's citizens enjoy civil liberties including freedoms of expression, assembly, association, education, and religion; also, if the countries has an established a generally fair legal system that ensures the rule of law, allow free economic activity and strives for equality of opportunity for everyone. ● Level of Peace-Score: The Global Peace Index, produced by the Institute for Economics & Peace (IEP), ranks 163 countries (99.7% of the world's population) according to 23 qualitative and quantitative indicators of peace. ● Political Rights-Score: This indicator captures perceptions of the extent to which a country enjoy a wide range of political rights, including free and fair elections; it considers also the functioning of the political system, assessing whether elected candidates actually rule, political parties are competitive, the opposition plays a role and has power, and minority group are represented. ● Human Rights Conventions-Score: Based on the fundamental human rights conventions. Score description: 0 if no conventions or treaties are ratified; 50 if some conventions and/or treaties have been ratified; 100 if all conventions and treaties have been ratified. <p>Higher value indicates a high level of adherence to promote and protect human rights and fundamental freedoms of individuals or groups.</p>
Income Inequality Score	<p>Average income inequality score, by measuring the distribution of income and economic inequality among the participants in a particular economy expressed through a standardized Gini coefficient.</p> <p>Range: 0 to 100 ; higher score represents lower level of income inequality.</p>
Freedom of Expression Score	<p>This indicator captures perceptions of the extent to which a country's citizens are able to participate in selecting their government, as well as freedom of expression, freedom of association and a free media. Countries receive a higher score only if they outperform their peers on the given indicator.</p> <p>Range: 0 to 100; higher score represents higher perceptions to which a country's citizens are able to participate in selecting their government, as well as freedom of expression, freedom of association and a free media.</p>
ILO Policy Non-Compliance	<p>Exposure of the benchmark portfolio to companies without due diligence policies on issues addressed by Conventions 1 to 8 of</p>

Disclosure Factors	Description
	<p>the International Labour Organisation. Aggregated quantitative indicator considering below listed indicators</p> <ul style="list-style-type: none"> • Freedom of Association Policy: This indicator provides an assessment of the quality of a company's freedom of association and collective bargaining policy. • Discrimination Policy: This indicator provides an assessment of the quality of a company's policy to eliminate discrimination and ensure equal opportunity. • Scope of Social Supplier Standards: This indicator provides a general assessment of whether the company has supply chain/contractors policies and the scope of social standards. • Supply Chain Management: This indicator provides an assessment of whether the company has a supply chain management system and how it is applied. <p>Range: 0 to 100; lower score represents high level of adherence to Conventions 1 to 8 of the International Labour Organisation.</p>
Gender Pay Gap Score	Difference between the average gross hourly earnings of female employees and the average gross hourly earnings of male employees, expressed as a percentage of the average gross hourly earnings of male employees
Female to Male Board Members	Ratio of female to male board members. Higher score represents higher representation of Female board members.
Accidents, Injuries, Fatalities Score	This metric assesses the rate of all recordable work-related injuries suffered by the company's employees and contractors and includes fatalities, lost time injuries, restricted work cases or medical treatment cases. Range: 0 to Not defined ; lower score represents lower level of accidents, injuries and fatalities rates.
Corruption & Bribery Convictions	Total number of convictions for violations of anti-corruptions and anti-bribery laws per company and across the company's family tree.
Consolidated Governance Score (Corporates)	Weighted average of Governance Risk Score. Range: 0 to 100; lower score represents higher rating.
Consolidated Governance Score (Sovereigns)	Weighted average of Governance ESG Factors Score. Range: 0 to 100; higher score represents higher rating.
Corruption Score	This indicator captures perceptions of the extent to which public power is exercised for private gain, including both petty and grand forms of corruption, as well as "capture" of the state by elites and private interests. Countries receive a higher score only if they outperform their peers on the given indicator. Range: 0 to 100; higher score represents low perception of corruption levels.
Political Stability Score	This indicator measures perceptions of the likelihood of political instability and/or politically-motivated violence, including terrorism. Countries receive a higher score only if they outperform their peers on the given indicator. Range: 0 to 100; higher score represents high perception of political stability.
Rule of Law Score	This indicator captures perceptions of the extent to which agents have confidence in and abide by the rules of society, and in particular the quality of contract enforcement, property rights, the police, and the courts, as well as the likelihood of crime and

Disclosure Factors	Description
	<p>violence. Countries receive a higher score only if they outperform their peers on the given indicator.</p> <p>Range: 0 to 100; higher score represents represents high perception of confidence in law and regulations.</p>

Disclaimer

Performance Disclosure/Back-Tested Data

Where applicable, S&P Dow Jones Indices and its index-related affiliates (“S&P DJI”) defines various dates to assist our clients by providing transparency. The First Value Date is the first day for which there is a calculated value (either live or back-tested) for a given index. The Base Date is the date at which the index is set to a fixed value for calculation purposes. The Launch Date designates the date when the values of an index are first considered live: index values provided for any date or time period prior to the index’s Launch Date are considered back-tested. S&P DJI defines the Launch Date as the date by which the values of an index are known to have been released to the public, for example via the company’s public website or its data feed to external parties. For Dow Jones-branded indices introduced prior to May 31, 2013, the Launch Date (which prior to May 31, 2013, was termed “Date of introduction”) is set at a date upon which no further changes were permitted to be made to the index methodology, but that may have been prior to the Index’s public release date.

Please refer to the methodology for the Index for more details about the index, including the manner in which it is rebalanced, the timing of such rebalancing, criteria for additions and deletions, as well as all index calculations.

Information presented prior to an index’s launch date is hypothetical back-tested performance, not actual performance, and is based on the index methodology in effect on the launch date. However, when creating back-tested history for periods of market anomalies or other periods that do not reflect the general current market environment, index methodology rules may be relaxed to capture a large enough universe of securities to simulate the target market the index is designed to measure or strategy the index is designed to capture. For example, market capitalization and liquidity thresholds may be reduced. In addition, forks have not been factored into the back-test data with respect to the S&P Cryptocurrency Indices. For the S&P Cryptocurrency Top 5 & 10 Equal Weight Indices, the custody element of the methodology was not considered; the back-test history is based on the index constituents that meet the custody element as of the Launch Date. Also, the treatment of corporate actions in back-tested performance may differ from treatment for live indices due to limitations in replicating index management decisions. Back-tested performance reflects application of an index methodology and selection of index constituents with the benefit of hindsight and knowledge of factors that may have positively affected its performance, cannot account for all financial risk that may affect results and may be considered to reflect survivor/look ahead bias. Actual returns may differ significantly from, and be lower than, back-tested returns. Past performance is not an indication or guarantee of future results.

Typically, when S&P DJI creates back-tested index data, S&P DJI uses actual historical constituent-level data (e.g., historical price, market capitalization, and corporate action data) in its calculations. As ESG investing is still in early stages of development, certain datapoints used to calculate certain ESG indices may not be available for the entire desired period of back-tested history. The same data availability issue could be true for other indices as well. In cases when actual data is not available for all relevant historical periods, S&P DJI may employ a process of using “Backward Data Assumption” (or pulling back) of ESG data for the calculation of back-tested historical performance. “Backward Data Assumption” is a process that applies the earliest actual live data point available for an index constituent company to all prior historical instances in the index performance. For example, Backward Data Assumption inherently assumes that companies currently not involved in a specific business activity (also known as “product involvement”) were never involved historically and similarly also assumes that companies currently involved in a specific business activity were involved historically too. The Backward Data Assumption allows the hypothetical back-test to be extended over more historical years than would be feasible using only actual data. For more information on “Backward Data Assumption” please refer to the FAQ. The methodology and factsheets of any index that employs backward assumption in the back-tested history will explicitly state so. The methodology will include an Appendix with a table setting forth the specific data points and relevant time period for which backward projected data was used. Index returns shown do not

represent the results of actual trading of investable assets/securities. S&P DJI maintains the index and calculates the index levels and performance shown or discussed but does not manage any assets.

Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the Index or investment funds that are intended to track the performance of the Index. The imposition of these fees and charges would cause actual and back-tested performance of the securities/fund to be lower than the Index performance shown. As a simple example, if an index returned 10% on a US \$100,000 investment for a 12-month period (or US \$10,000) and an actual asset-based fee of 1.5% was imposed at the end of the period on the investment plus accrued interest (or US \$1,650), the net return would be 8.35% (or US \$8,350) for the year. Over a three-year period, an annual 1.5% fee taken at year end with an assumed 10% return per year would result in a cumulative gross return of 33.10%, a total fee of US \$5,375, and a cumulative net return of 27.2% (or US \$27,200).

To the extent that regulatory authorities allow a rating agency to acknowledge in one jurisdiction a rating issued in another jurisdiction for certain regulatory purposes, S&P Global Ratings reserves the right to assign, withdraw or suspend such acknowledgement at any time and in its sole discretion. S&P Dow Jones Indices, including S&P Global Ratings, disclaim any duty whatsoever arising out of the assignment, withdrawal, or suspension of an acknowledgement as well as any liability for any damage alleged to have been suffered on account thereof. Affiliates of S&P Dow Jones Indices LLC, including S&P Global Ratings, may receive compensation for its ratings and certain credit-related analyses, normally from issuers or underwriters of securities or from obligors. Such affiliates of S&P Dow Jones Indices LLC, including S&P Global Ratings, reserve the right to disseminate its opinions and analyses. Public ratings and analyses from S&P Global Ratings are made available on its Web sites, www.standardandpoors.com (free of charge), and www.ratingsdirect.com and www.globalcreditportal.com (subscription), and may be distributed through other means, including via S&P Global Ratings publications and third-party redistributors. Additional information about our ratings fees is available at www.standardandpoors.com/usratingsfees.

S&P Global keeps certain activities of its various divisions and business units separate from each other to preserve the independence and objectivity of their respective activities. As a result, certain divisions and business units of S&P Global may have information that is not available to other business units. S&P Global has established policies and procedures to maintain the confidentiality of certain nonpublic information received in connection with each analytical process.

In addition, S&P Dow Jones Indices provides a wide range of services to, or relating to, many organizations, including issuers of securities, investment advisers, broker-dealers, investment banks, other financial institutions, and financial intermediaries, and accordingly may receive fees or other economic benefits from those organizations, including organizations whose securities or services they may recommend, rate, include in model portfolios, evaluate, or otherwise address.

Some indices use the Global Industry Classification Standard (GICS[®]), which was developed by, and is the exclusive property and a trademark of, S&P Global and MSCI. Neither MSCI, S&P DJI nor any other party involved in making or compiling any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability, or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P DJI, any of their affiliates

or any third party involved in making or compiling any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

S&P Dow Jones Indices products are governed by the terms and conditions of the agreements under which they may be provided. A license is required from S&P Dow Jones Indices to display, create derivative works of and/or distribute any product or service that uses, is based upon and/or refers to any S&P Dow Jones Indices and/or index data.

ESG Indices Disclaimer

S&P DJI provides indices that seek to select, exclude, and/or weight index constituents based on, but not limited to, certain environmental, social or governance (ESG) indicators, or a combination of those indicators, including the following: environmental indicators (including the efficient use of natural resources, the production of waste, greenhouse gas emissions, or impact on biodiversity); social indicators (such as, inequality and investment in human capital); governance indicators (such as sound management structures, employee relations, remuneration of staff, tax compliance, respect for human rights, anti-corruption and anti-bribery matters), specific sustainability or values-related company involvement indicators (for example, production/distribution of controversial weapons, tobacco products, or thermal coal), or controversies monitoring (including research of media outlets to identify companies involved in ESG-related incidents).

S&P DJI ESG indices use ESG metrics and scores in the selection and/or weighting of index constituents. ESG scores or ratings seek to measure or evaluate a company's, or an asset's, performance with respect to environmental, social and corporate governance issues.

The ESG scores, ratings, and other data used in S&P DJI ESG indices is supplied directly or indirectly by third parties (note these parties can be independent affiliates of S&P Global or unaffiliated entities) so an S&P DJI ESG index's ability to reflect ESG factors depends on these third parties' data accuracy and availability.

ESG scores, ratings, and other data may be reported (meaning that the data is provided as disclosed by companies, or an asset, or as made publicly available), modelled (meaning that the data is derived using a proprietary modelling process with only proxies used in the creation of the data), or reported and modelled (meaning that the data is either a mix of reported and modelled data or is derived from the vendor using reported data /information in a proprietary scoring or determination process).

ESG scores, ratings, and other data, whether from an external and/or internal source, is based on a qualitative and judgmental assessment, especially in the absence of well-defined market standards, and due to the existence of multiple approaches and methodologies to assess ESG factors and considerations. An element of subjectivity and discretion is therefore inherent in any ESG score, rating, or other data and different ESG scoring, rating, and/or data sources may use different ESG assessment or estimation methodologies. Different persons (including ESG data ratings, or scoring providers, index administrators or users) may arrive at different conclusions regarding the sustainability or impact of a particular company, asset, or index.

Where an index uses ESG scores, ratings or other data supplied directly or indirectly by third parties, S&P DJI does not accept responsibility for the accuracy or completeness of such ESG scores, ratings, or data. No single clear, definitive test or framework (legal, regulatory, or otherwise) exists to determine 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives. In the absence of well-defined market standards and due to the existence of multitude approaches, the exercise of judgment is necessary. Accordingly, different persons may classify the same investment, product and/or strategy differently regarding 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled objectives. Furthermore, the legal and/or market position on what constitutes an 'ESG', 'sustainable', 'good governance', 'no adverse environmental, social and/or other impacts', or other equivalently labelled

objectives may change over time, especially as further regulatory or industry rules and guidance are issued and the ESG sustainable finance framework becomes more sophisticated.

Prospective users of an S&P DJI ESG Index are encouraged to read the relevant index methodology and related disclosures carefully to determine whether the index is suitable for their potential use case or investment objective.
