

Three New Climate Change Index Series Launched by S&P Dow Jones Indices and Toronto Stock Exchange

Toronto, October 29, 2015: S&P Dow Jones Indices (S&P DJI), one of the world's leading providers of financial market indices, and Toronto Stock Exchange have today announced the launch of three new climate change index series for Canada: **S&P/TSX 60 Carbon Efficient Index**, **S&P/TSX 60 Carbon Efficient Select Index** and **S&P/TSX 60 Fossil Fuel Free Index**. All three indices are derived from the constituents of the S&P/TSX 60, Canada's leading equity benchmark.

The **S&P/TSX 60 Carbon Efficient Index** is designed to measure the performance of companies in the S&P/TSX 60 while overweighting/underweighting those companies that have lower/higher levels of carbon emissions.

The **S&P/TSX 60 Carbon Efficient Select Index** is designed to measure the performance of companies in the S&P/TSX 60 while excluding those companies with the largest relative carbon footprint. The Index is optimized so that it closely tracks the returns of the S&P/TSX 60.

The Carbon Footprint for both of the S&P/TSX 60 Carbon Efficient Index and the S&P/TSX Carbon Efficient Select Index is defined as the company's annual greenhouse gas (GHG) emissions and is calculated by **Trucost Plc**, a London-based firm that develops and sells products and services that evaluate the environmental performance of companies.

The **S&P/TSX 60 Fossil Fuel Free Index** is designed to measure the performance of companies in the S&P/TSX 60 that do not own fossil fuel reserves. **RobecoSAM**, an investment specialist focused exclusively on sustainability investing, conducted the research for ownership of fossil fuel reserves.

"We are pleased to launch three new climate change-related indices for Canadian market participants," says **Eric Sinclair, President, TMX Datalinx and Group Head of Information Services, TMX Group**. "The new indices recognize Toronto Stock Exchange issuers included in the S&P/TSX 60 for their efforts and performance in managing their environmental impact. As awareness of the effect of carbon emissions continues to grow, we believe investors will value these index offerings."

"S&P Dow Jones Indices is excited to bring its expanding series of carbon efficient and fossil fuel free indices to the Canadian market and its leading benchmark, the S&P/TSX 60," says **Julia Kochetygova, Head of Sustainability Indices at S&P Dow Jones Indices**. "With an increasing number of Canadian investors basing their investment decisions on how companies manage environmental issues, this S&P/TSX index series will provide an important and relevant benchmark within this space."
