

## Dow Jones International Internet Constituent Weighting Methodology Update

**NEW YORK, DECEMBER 20, 2024:** S&P Dow Jones Indices (“S&P DJI”) announces a methodology change to the Dow Jones International Internet Index.

To improve diversification and align with similar-themed indices, S&P DJI is implementing the following change to the Constituent Weightings section of the methodology:

Change	Previous	Methodology Updated
Constituent Weightings	At each rebalancing, the index FMC weights constituents, subject to a single constituent weight cap of 10%.	At each rebalancing, the index FMC weights constituents, subject to the following constraints, using an optimization procedure that chooses final weights in such a way as to minimize the sum of the squared difference of capped weight and uncapped weight, divided by uncapped weight for each company: <ul style="list-style-type: none"><li>• cap single company weights at 10%.</li><li>• cap the cumulative weight of all companies with weights greater than 4.5% at 45%.</li></ul>

### IMPLEMENTATION TIMING

This change will be implemented in conjunction with the upcoming March 2025 rebalancing, which takes effect prior to the market open on **Monday, March 24, 2025**, with the changes first visible to clients on **Friday, March 14, 2025**.
