

## Fidelity Emerging Markets Quality Income, Fidelity Europe Quality Income, Fidelity Global Quality Income, and Fidelity US Quality Income Indices Consultation – Results

**AMSTERDAM, JANUARY 22, 2025:** S&P Dow Jones Indices (“S&P DJI”) conducted a [consultation](#) with market participants on potential changes to the Fidelity Emerging Markets Quality Income, Fidelity Europe Quality Income, Fidelity Global Quality Income, and Fidelity US Quality Income indices.

S&P DJI is changing the ESG data provider from Sustainalytics to MSCI and removing the Sustainable Exposure assessment for the Fidelity Emerging Markets Quality Income, Fidelity Europe Quality Income, Fidelity Global Quality Income, and Fidelity US Quality Income indices. The changes are detailed in the table below:

Change	Methodology	
	Previous	Updated
Highlights	In addition to the annual reconstitution, the Index will be rebalanced in months other than February in the event any index constituent ceases to pay a dividend (this is established when the Indicated Dividend Yield is 0), identified as having an ESG controversy score of 5, or falls into a Business Activity, Sustainalytics’ Global Standards Screening exclusionary category, as of the relevant Observation Date as described under the Index Maintenance section	In addition to the annual reconstitution, the Index will be rebalanced in months other than February in the event any index constituent ceases to pay a dividend (this is established when the Indicated Dividend Yield is 0), is identified as having an ESG controversy score of <b>0</b> , or falls into a Business <b>Involvement, MSCI ESG Global Norms Screens</b> exclusionary category, as of the relevant Observation Date as described under the Index Maintenance section.
Data Source	FactSet Research Systems Inc. (“FactSet”) are used as the main source for the metrics in Eligibility Criteria and Index Construction, unless stated otherwise. Transcriptions have been mapped to FactSet functions in an Appendix that is available on request from S&P DJI and subject to Index Owner’s approval.	FactSet Research Systems Inc. (“FactSet”) and <b>MSCI ESG Research LLC (MSCI)</b> are used as the main source for the metrics in Eligibility Criteria and Index Construction, unless stated otherwise. Transcriptions have been mapped to FactSet functions and <b>MSCI data fields</b> in an Appendix that is available on request from S&P DJI and subject to Index Owner’s approval.
Exclusions based on Controversy Rating	Exclusions Based on Sustainalytics’ Controversy Rating As of each Observation Date, companies identified as having a Sustainalytics Controversy Rating of 5 are excluded from the Selection Universe.	Exclusions Based on <b>MSCI’s</b> Controversy Rating As of each Observation Date, companies identified as having an MSCI Controversy Rating of <b>0</b> are excluded from the Selection Universe

<b>Methodology</b>		
<b>Change</b>	<b>Previous</b>	<b>Updated</b>
<p>Exclusions Based on Sustainalytics' Global Standards Screening / MSCI ESG Global Norms Screens Overview</p>	<p>Exclusions Based on Sustainalytics' Global Standards Screening</p> <p>Sustainalytics' Global Standards Screening (GSS) provides an assessment of a company's impact on stakeholders and the extent to which a company causes, contributes, or is linked to violations of international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles. Information regarding related standards is also provided in the screening, including the Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, as well as their underlying conventions. Sustainalytics classifies companies into one of the following three status:</p> <ul style="list-style-type: none"> <li>• <b>Non-Compliant:</b> classification given to companies that do not act in accordance with the UNGC principles and its associated standards, conventions and treaties.</li> <li>• <b>Watchlist:</b> classification given to companies that are at risk of violating one or more principles, for which all dimensions for Non-Compliant status could not be established or confirmed.</li> <li>• <b>Compliant:</b> classification given to companies that act in accordance with the UNGC principles and its associated standards, conventions and treaties.</li> </ul> <p>As of each Observation Date, companies identified and deemed by Sustainalytics to be Non-compliant are excluded from the Selection Universe.</p>	<p><b>MSCI ESG Global Norms Screens Overview</b></p> <p>MSCI ESG Global Norms screens are not intended to verify ongoing commitments of companies to such norms and conventions or assess the quality of internal compliance monitoring mechanisms of the companies that commit to such external guidelines and standards. Instead, MSCI ESG Global Norms screens leverage MSCI ESG Controversies Flags to identify publicly traded companies and fixed income issuers involved in controversies that may constitute a breach of those global norms and conventions. MSCI has reviewed details of each set of norms and determined a mapping of ESG controversy cases to the specific policies and principles of the following global norms and conventions:</p> <ul style="list-style-type: none"> <li>• The Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises</li> <li>• The United Nations Global Compact Principles (UNGC)</li> <li>• The International Labour Organization's (ILO) conventions (Broad and Core Conventions)</li> <li>• The United Nations Guiding Principles on Business and Human Rights (UNGP)</li> </ul> <p>The screening factor values include Fail, Watch List, or Pass Signals based on the Severity of specific cases in which a company is implicated:</p> <ul style="list-style-type: none"> <li>• <b>Fail</b> - The company is directly involved in one or more Very Severe unresolved controversies related to aspects covered by the relevant global norms' policies.</li> <li>• <b>Watchlist</b> - The company has either i) settled most of the stakeholders' concerns related to its involvement in a Very Severe controversy related to aspects covered by the relevant global norm's policies, ii) continues to be involved in such controversy indirectly through its business partners, or iii) is involved in one or more controversies related to aspects covered by the relevant global norms but with a lesser severity.</li> <li>• <b>Pass</b> - The company has not been implicated in any ESG controversy cases related to aspects covered by the relevant global norms' policies, or its involvement in such cases is not considered to be severe enough to warrant a Fail or Watch List Signal.</li> </ul> <p>As of each Observation Date, companies identified and deemed by MSCI to be Non-compliant are excluded from the Selection Universe.</p>
<p>Treatment of missing data</p>	<p>Treatment of Missing Business Activities, Controversy Rating, ESG Risk Rating, and Global Standards Screening Data</p> <p>Companies without Sustainalytics' Product Involvement, Controversies Research, ESG Risk Rating, or Global Standards Screening data</p>	<p>Treatment of Missing <b>MSCI Data</b></p> <p>Companies <b>not in the MSCI ESG Ratings coverage</b> universe will be excluded from the Selection Universe. <b>Other missing MSCI data does not result in exclusion by default.</b></p>

Change	Methodology	
	Previous	Updated
	coverage will be excluded from the Selection Universe.  <i>For more information on Sustainalytics, please refer to <a href="http://www.sustainalytics.com">www.sustainalytics.com</a></i>	
ESG Exposure	After the previous steps, the index-level exposure to Index Constituents with Sustainalytics ESG Risk Ratings that are less than 30 is assessed. If the total weight attributed to this group is <50%, the weight of the group with Sustainalytics ESG Risk Ratings less than 30 is increased to 50% of the index's weight in proportion to their weights, and the weight of those Index Constituents with Sustainalytics ESG Risk Ratings of 30 or more is reduced to 50% of the index's weight in proportion to their weights. Increasing or reducing the respective weights of index constituents does not occur if the total weight attributed to Index Constituents with Sustainalytics ESG Risk Ratings that are less than 30 is above or equal to 50% or if there are no constituents with an ESG Risk Rating less than 30 in the Final Selection.	After the previous steps, the index-level exposure to Index Constituents with <b>MSCI ESG Ratings that are greater than or equal to BBB</b> is assessed. If the total weight attributed to this group is <50%, the weight of the group with MSCI ESG Ratings greater than or equal to BBB is increased to 50% of the index's weight, and the weight of those Index Constituents with MSCI ESG Ratings of BB or less is reduced to 50% of the index's weight. Increasing or reducing the respective weights of index constituents does not occur if the total weight attributed to Index Constituents with MSCI ESG Ratings that are greater than or equal to BBB is above or equal to 50% or if there are no constituents with an MSCI ESG Rating greater than or equal to BBB in the final selection.
Sustainable Exposure	Fidelity has created a framework to assess an index constituent's sustainability factors. For more information on sustainability factors and definition refer to Appendix V. The index-level exposure to index constituents deemed 'sustainable' is assessed.  Fidelity will score index constituents deemed sustainable according to the sustainability factors and definitions described in Appendix V with a score of 1.  If the sum of index weights of sustainable index constituents is below 1%, but greater than zero, their weights are increased to 1% and the remaining portion of the index's weights are reduced to 99%. Increasing and reducing index weights does not occur if there are no sustainable companies in the Final Selection.	--
Categories of Involvement	Please see the file <a href="#">here</a> for the full list.	Please see the file <a href="#">here</a> for the full list.
